- Empathy
- Leadership & Collaboration
- Relationship Building

PORTFOLIO

- SP Portfolio

WORK EXPERIENCE

Lead Product & Web Designer   2018 - 2025
Temenos | North Sydney NSW

Created and spearheaded a new unified design across all products in the Temenos Journey Manager suite. Designed and developed the Temenos employee, client and partners Resources and Documentation website. Developed an automated documentation publishing application to streamline and improve the documentation delivery system for the TJM suite.

Projects
- Owned the re-design of the Journey Manager suite (Manager, Maestro, Workspaces, Analytics, Springboard, Applicants)
- Designed and delivered the Temenos Resources and Documentation Website, merging Joomla CMS, Markdown (Docusaurus), XHTML (MadCap Flare) and custom HTML/JS
- Optimised and improved the Resources Website's Search Engine with a custom Ruby Script, pulling results from three different sources
- Streamlined the documentation process by introducing a custom project template to share across all Knowledge Teams globally
- Led an automated documentation publishing application to streamline and improve the documentation delivery system for the TJM suite

Business as usual
- Collaborating with Product Owners, setting priorities and deadlines
- Leading Product Design improvements and overall direction
- Managing and updating The Journey Manager Resources Website with new designs and functionalities
- Leading and mentoring Global Teams with tasks spanning from design to development
- Creating visual assets for all Journey Manager materials, deliverables and presentations

Lead Web Designer   2016 - 2018
Lightopia | Castle Hill NSW

Designed, developed and maintained an end-to-end application for internal products and client services.

Product & Web Designer   2005 - 2018
Freelancer | Australia, Italy, Thailand

Delivered end-to-end design solutions for startups, agencies, and enterprise clients, spanning web, mobile, and platform products. Specialized in user-centered design, prototyping, and visual systems that balance usability with business goals. Partnered directly with founders, engineers, and product teams to shape strategy, scale design systems, and bring digital products from concept to launch.
